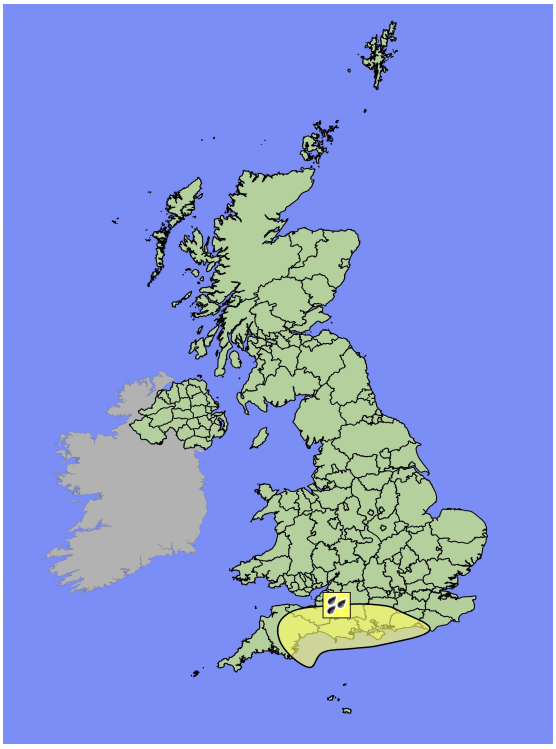
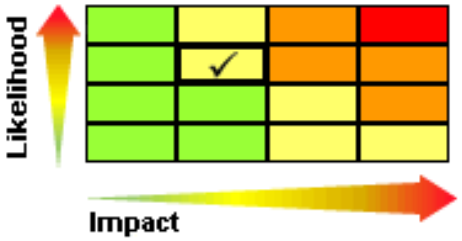
National Severe Weather Warning Service





Chief Forecasters Assessment
An active frontal system is expected to move northeastwards across the UK on Friday, bringing a spell of heavy rain to all regions. Southwest England is expected to be affected mainly during the morning and southeast England during the afternoon. 15-20 mm is expected, with perhaps locally 30 mm.

Winds over coasts will gust over 45 mph quite widely. Coupled with spring tides, this could lead to spray and over-topping of waves on exposed coasts.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **03:00 on Fri, 14th Dec 2012** until **18:00 on Fri, 14th Dec 2012**

Heavy rain is expected to spread northeastwards across the UK during Friday. The public should be aware of the possibility of local flooding and disruption to travel.
